GENI Foundation Annual Report for 2009-2010 year

Once again thank you

- In November 2009 the GENI team led by Willem Oudyk and gorgeous wife Tracey Roberts put on the 'Clean Energy' event at the Cameo Cinema in Belgrave with Dr Helen Caldicott as the Guest Speaker.

At this event we asked everyone to sign and mail a letter that we drafted to Martin Ferguson MP, the Energy Minister. This letter requested answers to a few questions, one being 'where does the Government stand with linking up Australia and Indonesia using renewable energy, providing energy to over 250 million people and jobs to both nations.' Over 100 letters were posted and our response was basically that the Government is not interested, and that this type of project should be handled via the private sector.

From this response, we are now in the second phase of manifesting this goal of linking Australia with Indonesia. We are now engaging VIPs and big businesses that want to make a stand and assist us in making this goal a reality. If you can help, please call us to discuss details.

Another by-product of this 'Clean Energy' event was a DVD which is on sale for \$20. For your copy please email me on admin@genifoundation.org.au

- Also a great thank you to Willem and Tracey for demonstrating their love for a world that works for everyone. Thank you for opening up your gorgeous dome home, the breakfasts... now that's the way to have any meeting!! Your kind donations and for setting up a Website for the GENI Foundation, finally!

"We are already solar powered." –Carl Sagan

- On UN World Environment Day 2010, we once again hosted an event at the Moonee Ponds Bowling Club. The Guest Speaker for his years' event was Peter Ellyard, Australia's own Futurist and Strategist. Peter took us into the future and showed us ways to see the planet from a Cosmonaut point of view.
- Many thanks to Peter Ellyard and to Charles Kovess for giving their all and for speaking at the WE Day event. Thank you also to the logistics support, Janene Laird, Natalie Smith, Christine Long, Danny Tiomkin, Chris James and to Chris and Linda Mully.

- We didn't have big numbers show up for this event, but we sure did have a few of those VIPs that we were asking for.
- Another huge win that came from this years' WE Day, is that the GENI Foundation initiated a meeting between the management of the Moonee Ponds Bowling Club, the Moonee Valley Councilors and The Environment Shop to propose totally Solar Powering the Bowling Club and Queens Park. The goal is for this project to be completed by next years' WE Day celebrations.
- You will also notice I have included the Annual Renewal Membership Form. Renewal date is Bucky's birthday 12 July.
- I trust you enjoy the monthly reports from Peter Meisen, Peter's reports are first hand information on the latest energy issues happening around the globe today.

And lastly, I would like to acknowledge you for your continued support in assisting us with this work. Every month I mail Peter's Monthly Report to our Prime Minister Hon Kevin Rudd, also to other Australian Ministers and other political parties, as well as to VIPs, our strong supporters and to our financial Members.

The mailouts, venue costs, website fees, and all the marketing of our public events every year is all supported by our financial members, for this we thank you!

Everything costs and our goal here in Australia has never been clearer, together we can build the steps to make Australia and her neighbours succeed in reaching true wealth for all, that is, everyone having access to clean energy and clean water without damage to the environment.
